

A BIODEGRADABLE OCULAR PATCH FOR TREATING EYE INFECTIONS AND A METHOD OF PREPARING THE SAME

Technology Description: The present invention relates to a biodegradable ocular patch for treating eye infections and a method of preparing the same.

Patent Status: Indian
Patent filed.

Is proof-of-concept (PoC) available? Yes

Current TRL Level: 3

Innovator(s): Nirmal
Jayabalan, Velmurugan
Kailasam, Prashant Garg.

Department & Campus:
Pharmacy, Hyderabad

Key Features & Benefits:

- The product of the present invention overcomes the stability issues of amphotericin
- It enables sustained drug release to reduce the frequency of administration
- Increase patient compliance.

Potential Application& Industries:

- The formulation can be used for ocular diseases
- Scalable for industries.
